

Dear Maxine,

I am writing to thank-you for helping my son Dylan with his reading, writing and comprehension through using the 'Starjump Program'. I would thoroughly recommend this program to any parent looking for help when the classroom teacher tells you that your child just doesn't seem to be able to keep up with the rest of the class, is easily distracted, keeps fidgeting and just won't sit still or is overcome by fear and anxiety when asked to read out aloud or do a spelling test. Since completing the 'Starjump' program Dylan has become more confident in reading, and has amazed himself and his teacher at his spelling prowess. This confidence has also helped him on an emotional level as he has become less anxious when faced with applying himself to new tasks in the classroom. The Starjump Program just makes so much sense once you are shown how a visual spatial learner thinks and how it can be applied in a linear world.

Thank-you Maxine for giving these kids a chance because they are very bright and now they have a platform where they can shine!!

Bis
