

I met Starjump in Malaysia when my son was 4 years old, and had issues with his speech, and development of related learning skills. Though the program starts formally for kids much older, they adapted to our needs and over the last 6 months provided us with all the relevant support and encouragement. I am delighted with the progress my son has made and look forward to a long term association with Joyce on this learning journey discovering news ways to learn and appreciate. Thank you starjump!
