

Hi Maxine,

Thankyou for providing us with this learning program for our children. It is making a remarkable difference in our home and school, and Victoria is also able to recognise this which is very encouraging to me as a parent, that she is able able to identify the positives also.

When Victoria was first assessed in May of 2008 she was half way through year 2 and had the writing standard of a new year 1 student. After just 5 months of Starjump, her writing level at the end of 2008 was equivalent to that of a finishing year 2 student, some 18 months of improvement in just 5.

The school has also been open minded in their approach to educating our daughter and have assisted us in implementing changes in the classroom to assist in meeting Victoria's learning style.

Being a parent of a gifted VSL is draining and time consuming however, and I would dearly love to meet other parents in similar situation in the Victorian Riverland.

Thankyou again Maxine, for providing the life line for us.

Kind regards

Stacey
